

COPEC S.A. ENVIRONMENTAL POLICY

COPEC

COPEC S.A. Environmental Policy

At Copec, we are defined by our commitment to Chile and our purpose: "We exist to promote the development and mobility of people, businesses, and the country," acting with excellence, minimizing the environmental impact of our processes, and seeking a balance between economic benefit and the value we bring to society.

This policy applies to Copec S.A.'s own operations in Chile. Copec also promotes the adoption of the principles and guidelines set out in this policy by its suppliers, contractors, and other key business partners, in accordance with the principles established in its Supplier Code of Ethics. Accordingly, at Copec we are committed to:

- **Protecting the environment** by identifying and managing the environmental impacts of our operations, applying a mitigation hierarchy that prioritizes avoidance and minimization, and offsetting when appropriate, taking a life-cycle approach and managing environmental risks and opportunities.

- **Having processes in place** to respond ethically, responsibly, and diligently to environmental risks or damage, mitigating and repairing the impacts under our responsibility and implementing measures to prevent their recurrence.

- **Complying with legislation** and applicable regulations, as well as our environmental commitments, incorporating environmental factors from the early stages of projects to prevent and reduce the impacts of our operations.

- **Fostering continuous improvement** of our environmental performance, setting environmental objectives and targets aligned with our corporate strategy.

- **Driving environmental management** within the organization and its stakeholders, through the implementation of and compliance with the guidelines of this policy.

- **Promoting responsible practices** throughout our value chain, encouraging the management of their activities based on environmental criteria, regulatory compliance, and continuous improvement, thereby contributing to the development of a more sustainable and resilient supply chain.

  Copec is committed to protecting the environment and integrating sustainability into all of its activities and its value chain. In line with its Climate Change Statement and other related policies, the company seeks to play a leading role in the global transition toward a more sustainable, circular, and decarbonized model, taking into account the needs of society.

In recent years, Copec has driven the transformation of its business model to strengthen its environmental performance, establishing the following strategic guidelines:

- **Driving the energy transition** through the use of renewable energy, the development of new energy capabilities, efficient energy use, sustainable mobility, and investment in technologies that help reduce greenhouse gas (GHG) emissions, while also preventing environmental pollution.

- **Strengthening comprehensive waste management**, promoting the circular economy and reducing waste generation.

- **Fostering the responsible and efficient use of natural resources**, including water and raw materials, through continuous process improvement and the adoption of more sustainable technologies.

- **Promoting staff training** regarding the impacts of our operations on the environment and the role of each employee in protecting it.

This Environmental Policy has been approved by the Board of Directors of Copec S.A., reflecting the company's commitment to environmental protection, sustainability, and long-term value creation. Its implementation and monitoring are overseen by the Sustainability Committee, the body responsible for ensuring compliance, periodic review, and continuous improvement.
